

### **Benefits of System z Processing**

The IBM System z™ mainframe servers are powerful, flexible processors that can meet almost any growth requirements. These servers deliver:

- Direct High-Speed Access to Your e-Business Applications
- Industrial-Strength Security
- Traditional System z™ Strengths for Handling Mission-Critical Applications
- High-Performance System z™ I/O & Storage Subsystems, Providing Throughput Required for Today's Applications

### **Vicom Infinity's Total Solutions**

Vicom Infinity's sophisticated IT solution offerings can include a broad range of products through its authorized partnerships. As an authorized IBM Business Partner, Vicom Infinity is certified to:

- Remarket IBM Hardware, IBM Software, IBM Warranties, & IBM Services
- Propose IBM Global Financing Preferred Rate Financing Packages
- Use IBM Tools, Processes, Technical Centers, & Product Development Centers

Through exclusive partnerships with its New York-based sister companies, Vicom Infinity also provides these complementary offerings:

- IBM xSeries™ & pSeries™ Server Solutions through Vicom Computer Services, Inc., an IBM Business Partner
- IT Recommendations, Implementation, Support, Training, Consulting Services, & IBM Mainframe & IBM Distributed Software Products through Infinity System Software, Inc., an IBM Business Partner

## **High Availability Processing Solutions**

With IBM® System z™ Mainframe Servers

### **High Accountability for High Availability**

Companies with high-availability environments know the risks involved with launching and managing major IT transformations. So do we. At Vicom Infinity, we add accountability to the mix. Our primary objective is to provide a seamless, "no impact" process to ensure our clients maintain full production and continued application maintenance of established workloads. Everything we do — from systems analysis to custom installations, through knowledge transfer — supports that objective.

As a major player in the high-end server market and an authorized IBM Business Partner, Vicom Infinity offers end-to-end systems planning, installation, and service support for the complete IBM System z™ line of servers.

### **Leading Performance**

With Vicom Infinity and IBM System z™ products, you can have the most advanced server consolidation platform and the technical expertise to put it to work for your company. The end result is a transformed IT infrastructure that is significantly simplified and infinitely more powerful.

Our complete solutions include:

- Comprehensive Analysis of Current & Planned IT Environments
- Installing New Systems
- Upgrading Existing Installations with Latest Technology
- Consolidating Workloads into IBM System z™ Processors
- Standard & Custom Software Configuration for Linux, z/OS™, ERP, Parallel Sysplex®, WebSphere®, Lotus Domino™
