

## Installation Services

*Vicom Infinity expertise spans the technological landscape offering leading edge solutions*

Our specialists possess advanced technical expertise in IBM operating systems, middleware, and distributed software. We have broad architectural and functional knowledge of IBM hardware including IBM Z, and Disk and Tape storage subsystems. The Vicom Infinity team are IBM certified subject matter experts with years of experience successfully delivering unparalleled service to our clients.

Vicom Infinity offers planning, installation, design, and support services for a myriad of environments from upgrades to complex, multi-product deployments across heterogeneous environments.

The Vicom Infinity team provides valuable expertise in the installation, configuration, customization, and validation of your hardware and software. This can potentially reduce your deployment time and risk to your business. Our team will ensure your implementation is successful and augments the value of your investment.

As with all of our client engagements, Vicom Infinity's Installation Services agreements are tailored to meet your specific needs. Whether you'd like Vicom Infinity to manage your full implementation or need specialized skills to consult or assist throughout your deployment, Vicom Infinity is committed to your successful installation.

### VICOM INFINITY INSTALLATION SERVICES DELIVER VALUE:

- Deep technical skill across all IBM product lines
- Expertise through all phases, from installation thru validation, minimizing risk and business disruption
